

The **SV-1000 Mini-Loc** is the only universal tape controller designed specifically for the musician / producer / engineer.

With features not even found on autolocators costing three times as much, the **SV-1000** installs easily within minutes and works on all reel-to-reels, from old Ampex AG 440S to TEAC 80-8S, to new decks from all manufacturers. With the auto-record feature you'll never miss a punch. With the auto-loop feature you'll never need to touch the tape transport while mixing or rehearsing. And with the auto-locate feature you won't lose time searching for cues. There is even a digital tape counter at your fingertips giving you complete control over your music. Without a doubt, the **SV-1000** is the affordable tape controller you can't afford to be without.
